About National STEM Program

In the National STEM program, students from 200 Govt Schools & Govt-aided Schools from 27 states in India will be trained in new-age technologies by STEM Learning team and Brillio team. These students compete in cluster and zonal rounds. The top teams comprising will compete in the finale- The National STEM Challenge.

Launched by Brillio and STEM Learning in 2019, the National STEM Challenge encompasses year-long activities, culminating with a national competition, where students tackle on-the-spot challenges, showcasing their problem-solving abilities within a limited timeframe. Outstanding projects are recognised in various categories.

The competition aims to ignite a passion for STEM fields among young minds, providing dynamic learning experiences, nurturing critical skills, exposing students to STEM careers, and inspiring further education and innovation in these fields. Brillio and STEM Learning have set up science labs and provided science kits for experiments and model-making in the schools that participated in the competition.

In addition, Brillio team will engage with the participants weekly through online sessions on tech-related news, stories, and quizzes, while guiding students to build STEM models. The students also made science models such as laser security alarms, vacuum cleaners, and hydraulic bridges using Brillio Science DIY kits.

The challenge has led to improved school attendance, active classroom and co-curricular participation, enhanced learning outcomes, digital literacy, and conceptual clarity in grade-specific subjects.
